Summary

Tech-driven and motivated student skilled in software development, VR simulations, and blockchain systems. Always exploring new tools to build efficient and meaningful digital solutions.

Skills

Languages: Java, C++
Frontend: React.js
DataBase: MySQl
Blockchain: Solidity (basic)
Web3 Tools: ethers.js, MetaMask
VR / XR Tools: Unity Engine, XR Interaction Toolkit
Tools: Git, GitHub, VS Code Projects

EscroChain – Decentralized Escrow Protocol

Tech Stack: React, JavaScript ES6+, ethers.js, Solidity,

- Built a blockchain-based escrow system enabling secure, trustless fund transfers.
- Used Solidity smart contracts to enforce escrow logic such as staking, cancellation, and confirmation before fund release.
- Created a browser-based interface for initiating and tracking transactions.
- GitHub: github.com/nithish008888/EscroChain

Hemodialysis VR Simulator

Tech Stack: Unity, C#, XR Interaction Toolkit

- Developed an immersive VR simulation replicating real hemodialysis procedures.
- Implemented machine operations, fluid flow systems, and XR-based interactions.
- Designed realistic visuals for medical learning and demonstration.
- GitHub: github.com/nithish008888/HemodialysisVR

Education

SASTRA Deemed University, Thanjavur
Master of Computer Applications (MCA) Present
CGPA: 7.44 (till 3rd semester)

PMIST University, Thanjavur
Bachelor of Computer Applications (BCA) 2021–2024

Maxwell Matriculation Higher Secondary School, Thanjavur
HSC Percentage – 75.83% Batch -2021
SSLC Percentage – 64% Batch - 2019

Interests

- Designing user interfaces and interactive systems
- Developing games and VR simulations using Unity
- Exploring modern front-end frameworks like React and Vue
